

CD-5

CD Player

★ High precision CD mechanism

★ Analogue outputs (XLR balanced and RCA unbalanced)

★ Digital outputs (Coax and Optical TOS)

★ External power supply (optional)

★ Intuitive user interface

★ Touchscreen display

★ High-performance 32-bit DAC

The CD-5 is simply the best CD Player available today on the market in this category. The high-precision CD mechanism and high-resolution D/A converter provide the utmost of accuracy, extracting every bit of information. The mechanical chassis and audio circuits have been engineered to achieve the highest sound quality, eliminating noise and intermodulation thanks to select audio grade components and analogue design of the signal path.

All the functions are easy to control with the touchscreen display and the remote (included), allowing you to enjoy the pleasure of your music. Fully balanced, it offer both analogue and digital outputs.

The CD-5 can be upgraded with the addition of the external power supply PSU-10 EVO to enjoy even better dynamics and finer details.
